SURGICAL GOWN CATALOG

SURGICAL GOWNS

SURGICAL GOWNS

MATERIALS:

SMS

Consists of 3 separate layers glued together thermally or with adhesive.

SMMS

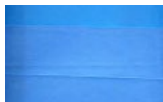

Consists of 4 separate layers glued together thermally or with adhesive.

SPUNFLEX

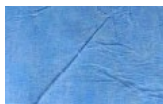

The product is formed by laminating the spunbond fabric with the film, as it is not very absorbent, it is only used as a table backdrop.

DUBLEX

It is composed of a polyethylene film and an absorbent (chemical band). The absorbent part has higher absorbency compared to spunbond.

TRIFLEX

It consists of 3 layers of material. It is formed by absorbent lamination + polyethylene film + spunbond interlining together.

PP

"Polypropylene".

PE

"Polyethylene".
